

AYUSH KUMAR

Software Engineer

Phase 3B2, Sector 60, Mohali •

+91 7876742770 •

ayush7dev@gmail.com •

OBJECTIVE

Software Engineer working across backend and frontend development to build scalable APIs and production-ready applications, with an emphasis on clean, efficient, and maintainable code, performance optimization, reliable system design, robust architecture, API security, database efficiency, scalable cloud-ready solutions, modern frameworks, RESTful services, version control, testing practices, and continuous integration workflows.

PROFESSIONAL EXPERIENCE

Software Engineer

Uimatic, Mohali

May 2025 – Present

Developed and maintained RESTful APIs using Laravel (PHP) for production e-commerce platforms. Contributed to the development of a multi-tenant architecture, enabling multiple stores and clients to operate within a single platform. Built the e-commerce frontend using Vue.js with Pinia state management, integrating backend APIs to support core shopping functionality and improve overall user experience.

Full Stack Developer

V Recruiters, Zirakpur

November 2024 – April 2025

Worked as a Full-Stack Developer at V Recruiters in Zirakpur, focusing mainly on backend development, building RESTful APIs, and contributing to dynamic web applications while ensuring clean, maintainable, and scalable code practices.

MERN Stack Trainee

Excellence Technology, Mohali

June 2024 – November 2024

Participated in code reviews, debugging, and optimizing code to improve performance and scalability. Gained hands-on experience with version control using GitHub and worked with project management tools to track development tasks. Collaborated with team members to develop and maintain web applications using MongoDB, Express.js, React, and Node.js.

EDUCATION

GOVT. COLLEGE DHALLIARA – KANGRA

Bachelor of Computer Applications, May 2024
CGPA 7.88

KENDRIYA VIDYALAYA NALETI– KANGRA

12TH CLASS, APRIL 2021
With 83%

KENDRIYA VIDYALAYA NALETI – KANGRA

10TH CLASS, APRIL 2019
WITH 70%

SKILLS

FRONTEND

HTML, CSS, JavaScript, TypeScript, React.js, Vue.js

BACKEND

Node.js, Express.js, PHP, Laravel

AI TOOLS

Claude CLI, Codex CLI, Cursor, Antigravity.

SOFT-SKILLS

Patience, Communication, Time Management, Adaptability, Helpfulness

MAJOR CLIENTS PROJECT'S

1. E-commerce (Multi-Tenant Architecture)

Developed and maintained a scalable e-commerce platform with the frontend in Vue.js and backend in Laravel. The system follows a multi-tenant architecture—Integrated PayMongo for handling online payments and uses Lalamove services for delivery management.

2. React Native App

Developed and maintained a scalable e-commerce app with the frontend in React Native.

3. BUS BOOKING – MERN

Developed and maintained an bus booking website just like red bus frontend with React and backend on Node.js/express.js .
