Strong hands-on knowledge of **MySQL, MongoDB, Redis, BullMQ, Socket.io, Docker, JWT, and REST APIs**, with experience integrating third-party payment, delivery, and POS systems. Skilled in debugging, system integration, and delivering reliable solutions in collaborative development environments.

## Experience

**Software Engineer** **May 2025 - Present**

*Uimatic, Mohali*

- Developed and maintained scalable RESTful APIs and backend services in **Node.js, backed by MySQL**, powering core features of a **multi-tenant e-commerce** platform.
- Integrated third-party payment, **delivery, and POS systems** for real-time data sync across **52 tenant** storefronts, using Redis for background job processing; containerized services with Docker and tested APIs using Postman.
- Built and enhanced customer-facing features across **Vue.js/React.js** websites and a Canvas LMS LTI application.

**Full Stack Developer** **Nov 2024 - Apr 2025**

*V Recruiters, Zirakpur*

- Designed and developed **RESTful APIs in Node.js and Express.js** to support core **recruitment workflows**, including candidate applications, job postings, and status tracking.
- Built and maintained an Admin Panel enabling recruiters to manage candidate data, job listings, and user roles **(RBAC)**, streamlining day-to-day application processing.
- Identified and **resolved backend bugs** across API endpoints, improving data consistency.

**MERN Stack Trainee** **June 2024 - Nov 2024**

*Excellence Technology, Mohali*

- Learned the fundamentals of the **MERN Stack** (MongoDB, Express.js, React.js, and Node.js) through hands-on projects.
- Gained practical experience with **Git, GitHub, REST APIs, and database integration**.
- Strengthened core **JavaScript**, debugging, responsive web development, and software development workflow skills.

## Projects

**Flow** | Notion/Trello/Slack-inspired SaaS Platform | React, Node.js, MongoDB, Redis, Socket.io

- Built a full-stack collaboration platform combining **Kanban boards**, workspace **notes**, and **real-time team chat**, using React 19 + **Redux Toolkit** on the frontend and Express + MongoDB on the backend.
- Implemented JWT-based authentication with httpOnly cookies, access/refresh token rotation, and workspace-scoped **RBAC** (owner/admin/member) enforced across nested resources (boards → lists → cards).
- Designed a **drag-and-drop Kanban board** with optimistic UI updates (dnd-kit) and a position-based ordering system on the backend, with real-time sync via **Socket.io** across boards and workspaces.

**Bebang** | Multi-Tenant E-Commerce Platform | Vue.js, Node.js

- Built and maintained a **multi-tenant e-commerce** platform with a Vue.js frontend and Node backend, supporting multiple storefronts from a shared codebase.
- Designed **order-sync** logic reconciling orders across multiple channels (website, in-store) with the in-store **POS system**, using reference and service-type identifiers to distinguish order origin reliably.
- Integrated third-party services for online **payments** (PayMongo) and **delivery** (Lalamove), including sandbox environment setup and credential management.
